

# Personal SWOT Analysis Worksheet

- For instructions on using Personal SWOT Analysis, visit [www.mindtools.com/personalswot](http://www.mindtools.com/personalswot).

<p><b>Strengths</b></p> <p>What do you do well? What unique resources can you draw on? What do others see as your strengths?</p>	<p><b>Weaknesses</b></p> <p>What could you improve? Where do you have fewer resources than others? What are others likely to see as weaknesses?</p>
<p>I feel like going through the course twice has put me at a bit of an advantage, I've picked up more and more things from having two different instructors, and I'm feeling a lot more confident and prepared (so far).</p> <p>I enjoy the front end a bit more than back end, but I'm still excited to relearn backend. I think I'll have a really good foundation of both by the time I'm done, I feel like I can be a more flexible when it comes time to get a job.</p> <p>I'm a responsible guy, when it comes to working, I've always put in my best effort, I just need to get hired to show what I can do. :)</p>	<p>I'm getting better at this, but understanding code from google has always been kind of difficult for me, I find myself going from link to link to try to find an easier solution rather than understanding the top result. I feel like a lot of stackoverflow answers can be confusing.</p> <p>When I got sick, I thought I would forget everything, but when I jumped back into building something, I found that I still had a good understanding. This lack of faith in myself has always been a bit of a weakness, but I'm now really trying to work on it.</p>
<p><b>Opportunities</b></p> <p>What opportunities are open to you? What trends could you take advantage of? How can you turn your strengths into opportunities?</p>	<p><b>Threats</b></p> <p>What threats could harm you? What is your competition doing? What threats do your weaknesses expose you to?</p>
<p>My buddy still says Allata would be a good one for me to try out, he really thinks I'd have a chance at getting hired.</p> <p>I've made a lot of friends at CodeWorks, and since I'm going through twice, I'm getting to know a lot of like minded people, it's been great and it'd be awesome to work with them some day.</p>	<p>I found it pretty difficult to code on my own when I had a bit of free time while I was recovering from covid. For now I'm going to blame it on the fact that I was sick, but it really got me thinking about when this course is over. I think I'm going to need to push myself to keep creating. It's pretty hard to come up with ideas on what to work on without the structure of the course.</p> <p>I'm also really excited for the finding your fit section of the course, because that's something I've been a bit worried about. I hope I don't instantly take a job that I really hate.</p>
